

CASABLANCA MOHAMMED V AIRPORT

HOME THE INSTITUTION MAJOR PROJECTS CASABLANCA MOHAMMED V AIRPORT		SHARE	
Historic of the ONDA		ONDA's ambition is to transform Casablanca Mohammed V airport into a modern, adaptable infrastructure that meets the long-term needs of airlines and passengers, with the aim of establishing it as a world-class HUB airport connecting Africa to other continents.	
Financial performance			
Missions		This ambition is in line with the national airline's development plan, tourism strategy and the prospect of hosting the World Cup in 2030.	
Our Values			
Partnerships and sponsoring		In this context, ONDA plans to launch a major long-term development project for Casablanca Mohammed V airport. This program would consist of the following:	
Environmental Management Systems		The construction of a third independent parallel runway with associated aeronautical infrastructure	
Major projects		The construction of a new, expandable terminal area with state-of-the-art equipment	
MARRAKECH MENARA AIRPORT		The construction of a new control tower.	
CASABLANCA MOHAMMED V AIRPORT		External developments on the airside and landside	
AGADIR AL MASSIRA AIRPORT		The future development of airport infrastructure will occur on the west side of the existing terminals, involving the construction of a new runway and taxiways to enable independent parallel approaches. It also includes the construction of terminal facilities and aircraft parking between the new runway and the existing pair
